

Supplementary Figure 1: Invasiveness and migratory ability of MGC803 cells after treatment with Huaier. (A) The invasiveness of MGC803 cells after treatment with Huaier at different concentrations was evaluated in Transwell assays at 24 h. (B) The migration ability of MGC803 cells after treatment with Huaier at 0.5mg/ml was evaluated with wound healing assay. (※ represents $p < 0.05$)
