

Supplementary Materials

Supplementary Tables

Supplemental Table S1: The Detailed Information on Antibodies Used for IHC and Western Blot

| Antibody | Vendor | Source | Working dilution |
|---------------------------|---------------------------|--------|------------------|
| anti-CDH13 | R&D systems | goat | IHC&WB: 1:1000 |
| anti-E-cadherin | Signalway Antibody | rabbit | WB: 1:1000 |
| anti- β -catenin | Signalway Antibody | rabbit | WB: 1:1000 |
| anti-Vimentin | Santa Cruz Biotechnology | rabbit | WB: 1:200 |
| anti-N-cadherin | Santa Cruz Biotechnology | rabbit | WB: 1:200 |
| anti-SNAI1 | Cell Signaling Technology | mouse | WB: 1:500 |
| anti-GSK3 β | Cell Signaling Technology | rabbit | WB: 1:1000 |
| anti-phos-GSK3 β | Cell Signaling Technology | rabbit | WB: 1:1000 |
| anti-GAPDH | Cell Signaling Technology | Rabbit | WB: 1:5000 |
| Donkey Anti-Goat IgG(H+L) | Proteintech | Donkey | WB: 1:2000 |
| Goat Anti-Rabbit IgG(H+L) | Proteintech | Goat | WB: 1:2000 |
| Goat Anti-Mouse IgG(H+L) | Proteintech | Goat | WB: 1:2000 |

Supplemental Table S2: Primer sequences of quantitative real-time PCR

| Gene | Sequences 5'-3' |
|------------------|--|
| CDH13 | TCCCTGCAGCATCAAACCAT ACAAATGGGGACTCACGGTC |
| LRP5 | CTGTACCCGCCGATCCTGA GGCGCCATTCTCGAATGAT |
| NBEAL1 | CCAGACAGTGGGAAAACCGA TCCCTGAAACACCTTGCAGTT |
| SNAIL1 | TAGCGAGTGGTTCTTCTGCG AGGGCTGCTGGAAGGTAAAC |
| IFI44L | CCTCTTCTAACAACCCATGCT AGCTTTCACAGCTAGTAAGAGGA |
| ADCY1 | GAGGGGACAAGGAAGGTGC CAAAGGAGCTGCCAAACCC |
| β -catenin | ACGGAGGAAGGTCTGAGGAG GAGTAGCCATTGTCCACGCT |
| GAPDH | GACCCCTTCATTGACCTCAACTAC TGGTGGTGCAGGATGCATTGCTGA |

Supplemental Table S3: The effect of CDH13 in orthotopic mouse model of pancreatic cancer

| | Empty vector | CDH13 overexpression | <i>P</i> -value |
|----------------------------|-----------------|----------------------|-----------------|
| | MEAN ± SEM | MEAN ± SEM | |
| Tumor weight(g) | 1.6830 ± 0.1402 | 0.6138 ± 0.1520 | 0.000* |
| Liver weight(g) | 1.3360 ± 0.0285 | 1.1730 ± 0.0464 | 0.009* |
| Liver metastasis(case) | 4/8 | 0/8 | 0.038* |
| Colon metastasis(case) | 3/8 | 0/8 | 0.055 |
| Mesentery metastasis(case) | 6/8 | 0/8 | 0.003* |
| Kidney metastasis(case) | 1/8 | 0/8 | 0.500 |

* *P* < 0.05

Supplemental Table S4: The effect of CDH13 in subcutaneous mouse model of pancreatic cancer

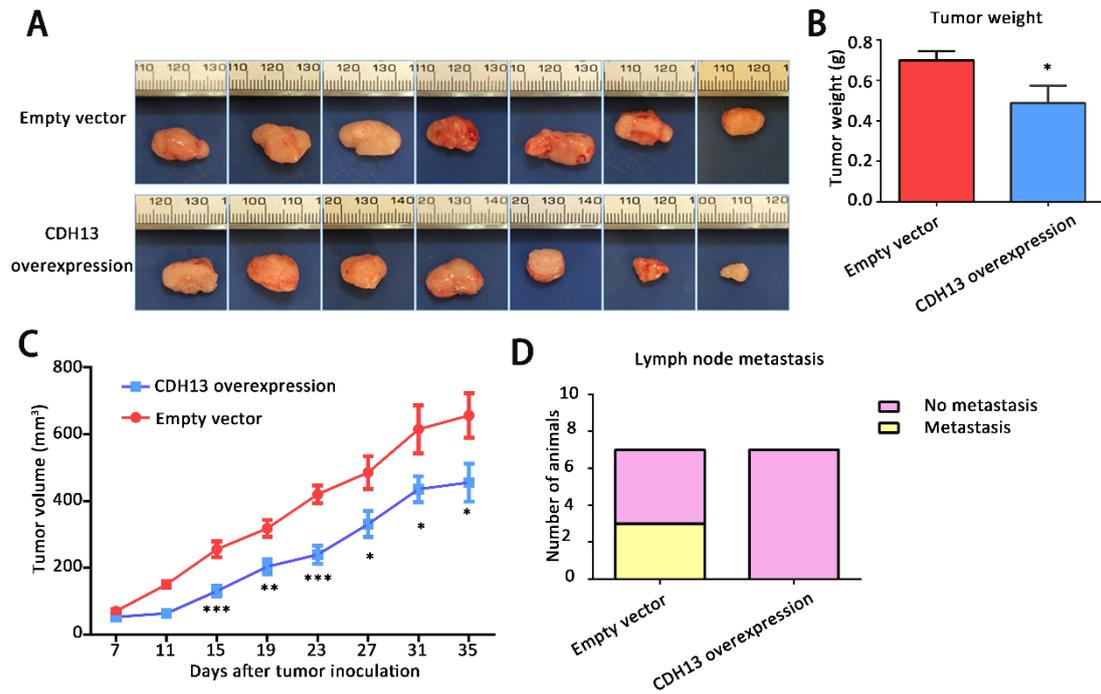

| | Empty vector | CDH13 overexpression | <i>P</i> -value |
|-----------------------------|-----------------|----------------------|-----------------|
| | MEAN ± SEM | MEAN ± SEM | |
| Tumor weight(g) | 0.7000 ± 0.0445 | 0.4871 ± 0.0861 | 0.049* |
| Lymph node metastasis(case) | 3/7 | 0/7 | 0.096 |

* $P < 0.05$

Supplemental Table S5: Significant findings in this manuscript

| Significant findings | <i>P</i> values |
|--|---------------------|
| CDH13 expression was downregulated in PC specimens and cells | |
| Downregulation of CDH13 expression (tumor tissues <i>vs</i> para-tumor normal tissues) | <i>P</i> < 0.001 |
| Downregulation of CDH13 expression (PC cells <i>vs</i> normal pancreatic ductal cells) | <i>P</i> < 0.001 |
| CDH13 overexpression inhibited the cell viability, migration and invasion of PC cells <i>in vitro</i> | |
| Decreased cell viability (CDH13-overexpressing cells <i>vs</i> control cells) | <i>P</i> < 0.05 |
| Decreased cell migration (CDH13-overexpressing cells <i>vs</i> control cells) | <i>P</i> < 0.05 |
| Decreased cell invasion (CDH13-overexpressing cells <i>vs</i> control cells) | <i>P</i> < 0.05 |
| CDH13 inhibited tumor growth and metastasis <i>in vivo</i> | |
| Decreased tumor weight (CDH13 overexpression group <i>vs</i> empty vector group) | <i>P</i> < 0.05 |
| Decreased tumor metastasis (CDH13 overexpression group <i>vs</i> empty vector group) | <i>P</i> < 0.05 |
| CDH13 overexpression exerted anti-EMT effect in CFPAC-1 cells | |
| Upregulation of E-cadherin expression (CDH13-overexpressing cells <i>vs</i> control cells) | <i>P</i> < 0.05 |
| Downregulation of N-cadherin, Vimentin, and SNAIL1 expression (CDH13-overexpressing cells <i>vs</i> control cells) | All <i>P</i> < 0.05 |
| CDH13 overexpression inhibited the activation of the Wnt/ β -catenin signaling pathway | |
| Downregulation of LRP5, β -catenin, and p-GSK3 β expression (CDH13-overexpressing cells <i>vs</i> control cells) | All <i>P</i> < 0.05 |

Supplementary Figure

Supplementary Figure S1. CDH13 overexpression inhibited PC progression in subcutaneous tumor model. CDH13-overexpressing CFPAC-1 cells were subcutaneously injected into the nude mice. Cells transfected with the empty vector were used as a control. A, The subcutaneous PC tumors dissected at the time of euthanasia. B, The comparison of the weights between the CDH13-overexpressing tumors and controls. C, Growth curve based on the volumes of CDH13-overexpressing tumors and controls. D, The animals with lymph node metastasis in each group were counted. Data are presented as the mean \pm SEM; $n = 7$ per group. * $P < 0.05$, ** $P < 0.01$ and *** $P < 0.001$, compared with the control group.
