

## Supplementary File

**Figure.1** Non-metastatic esophageal adenocarcinoma survival nomogram

**Figure.2** Non-metastatic esophageal squamous cell carcinoma survival nomogram

**Figure.3** The calibration curve for predicting patient survival at (A) 3 years and (B) 5 years in the EAC cohort and at (C) 3 years and (D) 5 years in the ESCC cohort. Nomogram-predicted probability of overall survival is plotted on the x-axis; actual overall survival is plotted on the y-axis.
