Supplementary Table s1. External data validation of the prediction model for infection during the intravesical instillation.

		Infection (Validation cohort)		Total
		No	Yes	
Infection	No	86	21	107
(Prediction model)	Yes	15	52	67
Total		101	73	174

Sensitivity =52/(52+15)=77.6%

Specificity =86/(86+21)=80.4%
