Article title

RNA Interference-Mediated Aurora Kinase A Gene Silencing Inhibits Human Glioma Cells Proliferation And Tumor Growth In Mice

Running title: Aurora A silencing inhibits glioma growth

Supplemental Fig. 1 Effects of Aurora A silencing with siRNA on Aurora B and Aurora C kinases expression in glioma cells. U251 cells were transiently transfected with Aurora A siRNA, control siRNA or no-treated (parental) for 48 h. Aurora B and Aurora C protein expression were examined by Western Blot with an Aurora B or Aurora C specific antibody, respectively. β -actin served as an internal control.
