

## Supplementary Figure 1

**Figure S1 BRD7 cannot regulate mutant p53 protein expression and its downstream signaling.** (A) Western blot analysis for p53 and its target genes, Bcl-2, Bax, Bak, p21 and cyclin D1 in MD-MB-231 cells transfected with plasmid vector or BRD7 expressed plasmid. \*\*\* $p < 0.001$  vs vector. (B) Relative mRNA levels of p53 and its target genes, Bcl-2, Bax and Bak, in MDA-MB-231 cells transfected with vector plasmid or BRD7 expressed plasmid measured by real-time PCR.
