

Supplementary Figure 1

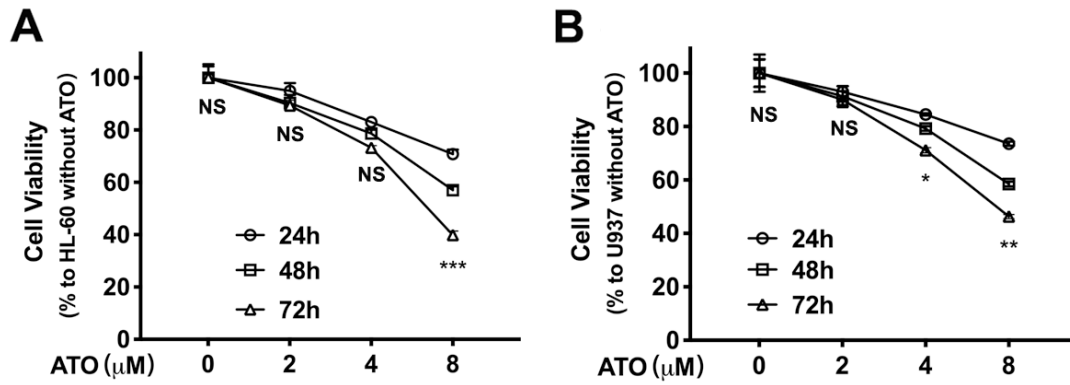

Figure S1. ATO induced the inhibition of cell viability in HL-60 and U937 wild type cells. (A) and **(B)** The cells were exposed to various concentrations of ATO for 24h, 48h and 72h, and cell viability was assessed by MTS. Data are presented as the mean \pm SEM (n=3) (NS=no significance, * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$). The absorbance values of each group were compared to that of control group with ddH₂O, which was normalized as 100%.
