Supplementary figure 1. CCK8 drug sensitivity experiment was used to detect the cross-resistant of OXA/R and 5-FU/R to other chemotherapy drugs.
Supplementary figure 2. CRNDE silencing inhibited apoptosis of GC cells in vitro.

(A) RT-PCR analysis of CRNDE expression in MGC803 cells transfected with shCRNDE. (B) The protein levels of cleaved-caspase3 and cleaved-PARP in MGC803 cells transfected with shCRNDE were determined by western blot assay. (C) Flow cytometric analysis of apoptosis in MGC803 cells transfected with shCRNDE.
