

Supplementary Figures**Fig. S1 Identification of biomarkers**

In the heatmap, blue indicates low expression, and red indicates high expression; in the volcano plot, blue dots represent the expression of biomarkers with $P < 0.05$ and \log_2 fold change (FC) < 1.2 . Red plots represent the expression of biomarkers with $P < 0.05$ and \log_2 FC > 1.2 . Black plots represent genes that expressed biomarkers normally. The X-axis indicates the \log_2 FC of the expression of biomarkers between normal and tumour samples. The Y-axis indicates the $\log_{10} P$ value for each biomarker. A: Heatmap and volcano plot of circRNAs between OSCC and normal samples from GSE118750. B: Heatmap and volcano plot of miRNAs between OSCC and normal samples from TCGA. C: Heatmap and volcano plot of mRNAs between OSCC and normal samples from TCGA.

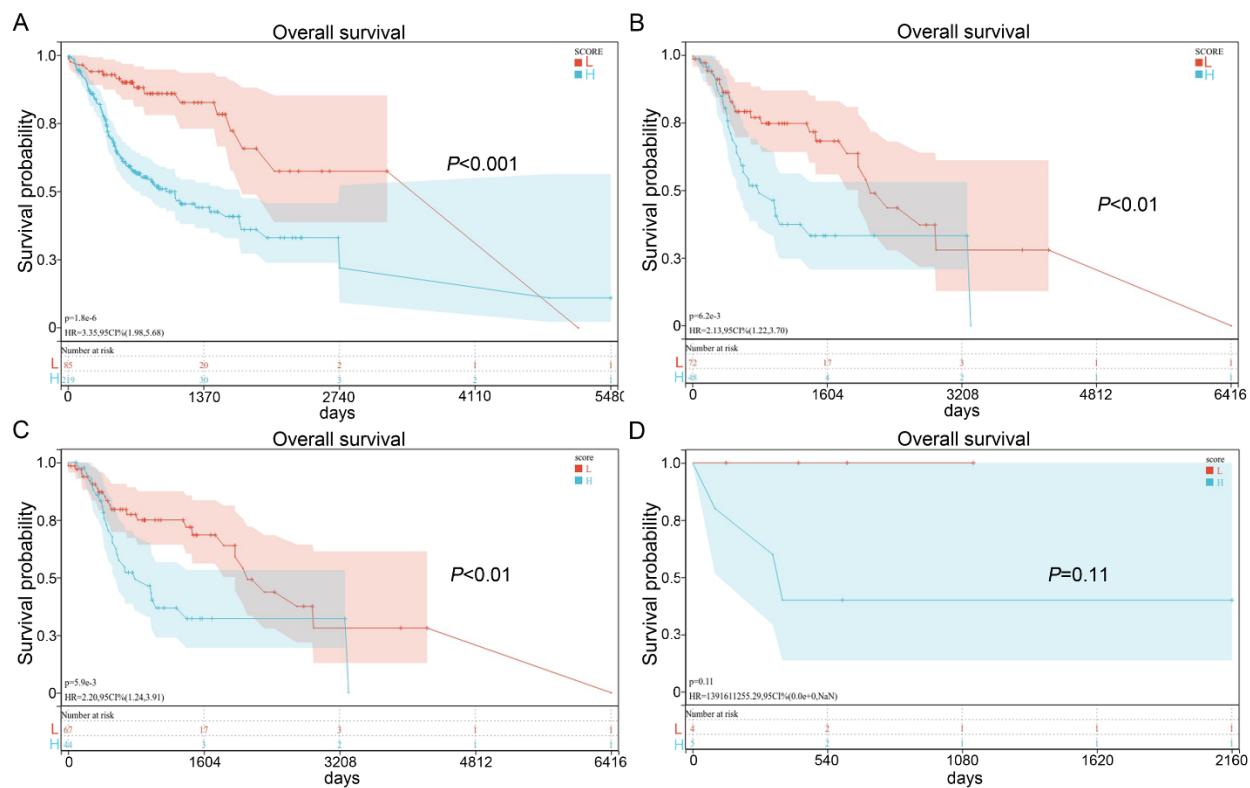

Fig. S2 Survival analysis of the external validation dataset from TCGA

The matrix and clinical information from the original oral cancer cohort were substituted into the risk score formula, and the obtained risk scores were grouped by the optimal cut-off value given by the R package maxstat; L represents the low-risk group, and H represents the high-risk group.

A. The results of the multigroup comparison analysis based on the log-rank test; $P=1.8e-6 < 0.01$, $HR=3.35$, 95 CI% (1.98, 5.68). B. Data for the 120 external cohorts containing matrix and clinical information from TCGA were input into the formula of the prognostic model; the results of the multigroup comparison analysis based on the log-rank test are shown; $P=6.2e-3 < 0.01$, $HR=2.13$, 95 CI% (1.22, 3.70). C. The results of the survival analysis of the laryngeal cancer data were statistically significant, $P=5.9e-3 < 0.01$, $HR=2.20$, 95% CI (1.24, 3.91). D. The results of the survival analysis of hypopharyngeal cancer were not statistically significant ($P=0.11$).

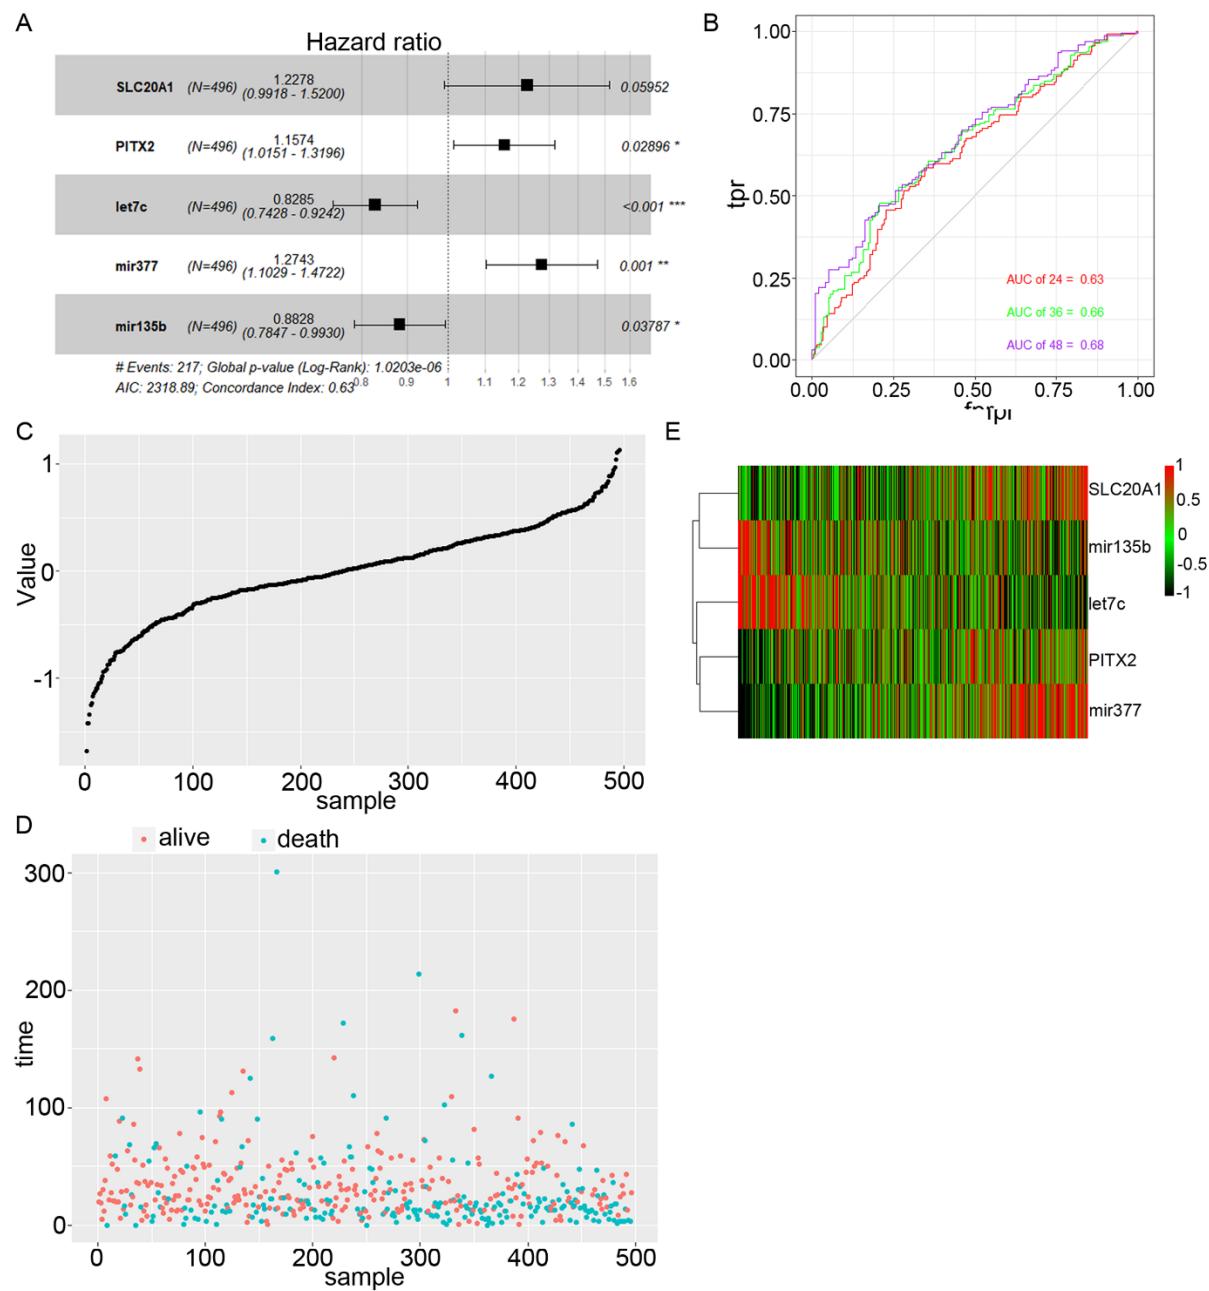

Fig. S3 Relationship between five biomarkers and risk scores of HNSC patients.

A: Forest plot of five biomarkers in HNSC. B: ROC curves for 2-, 3-, and 4-year survival with AUC values in HNSC. C: Risk scores of HNSC patients in ascending order. D: Survival times and status of HNSC patients in order of increasing risk score. Red dots represent survival, and blue dots represent death. E: Heatmap showing the expression of these five biomarkers in HNSC in order of increasing risk score.

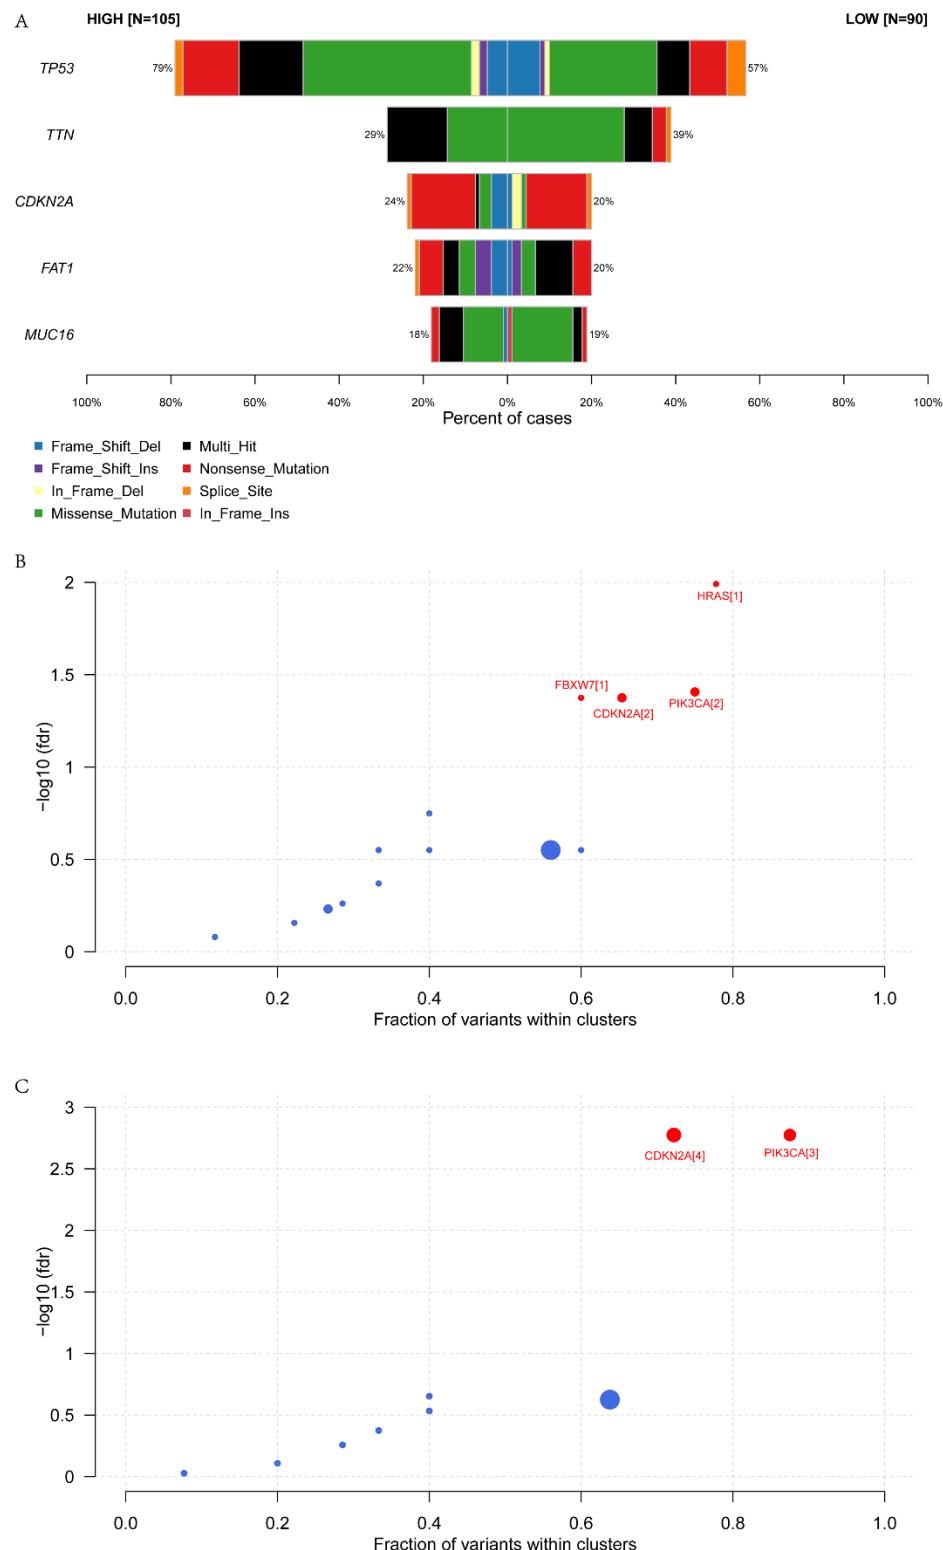

Fig. S4 Somatic mutation analyses

A: Differences in mutant genes between the high-risk group and the low-risk group. B: Cancer driver genes in the high-risk group. C: Cancer driver genes in the low-risk group.

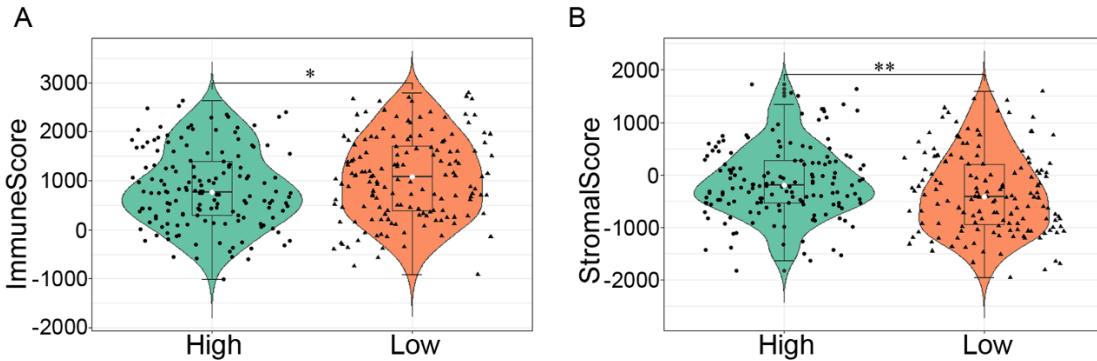

Fig. S5 Immune scores and stromal scores for high-risk and low-risk samples.

A: Immune scores of high-risk and low-risk samples obtained by ESTIMATE. B: Stromal scores for high-risk and low-risk samples obtained by ESTIMATE.

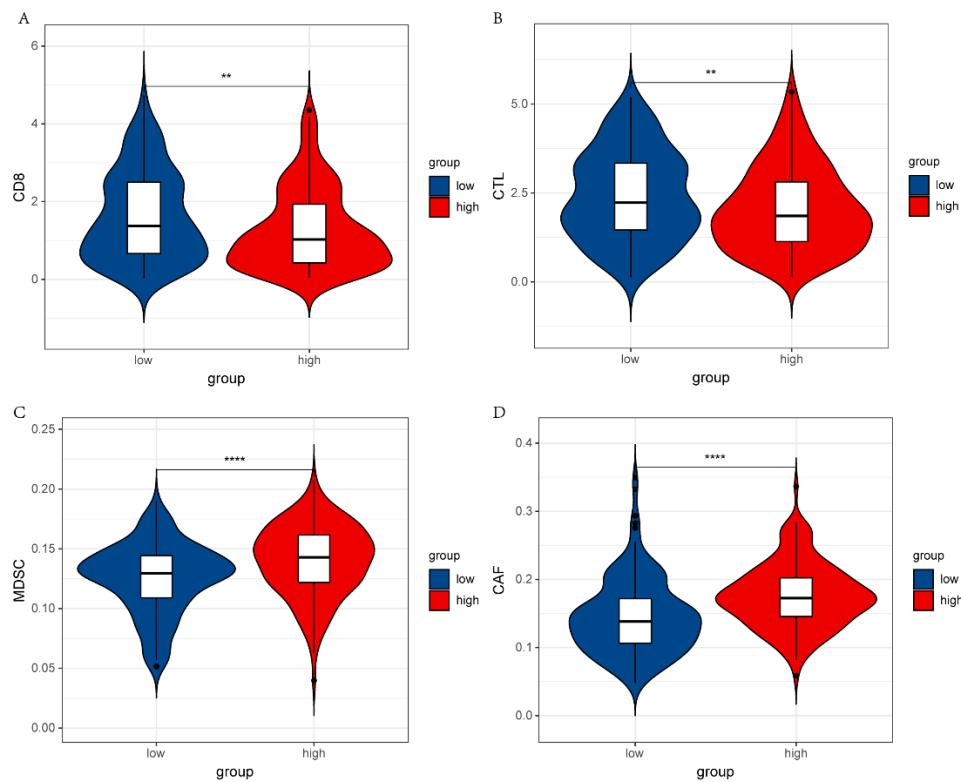

Fig. S6 TIDE analysis

A: CD8 scores for high-risk and low-risk samples. B: CTL scores for high-risk and low-risk samples. C: MDSC scores for high-risk and low-risk samples. D: CAF scores for high-risk and low-risk samples.

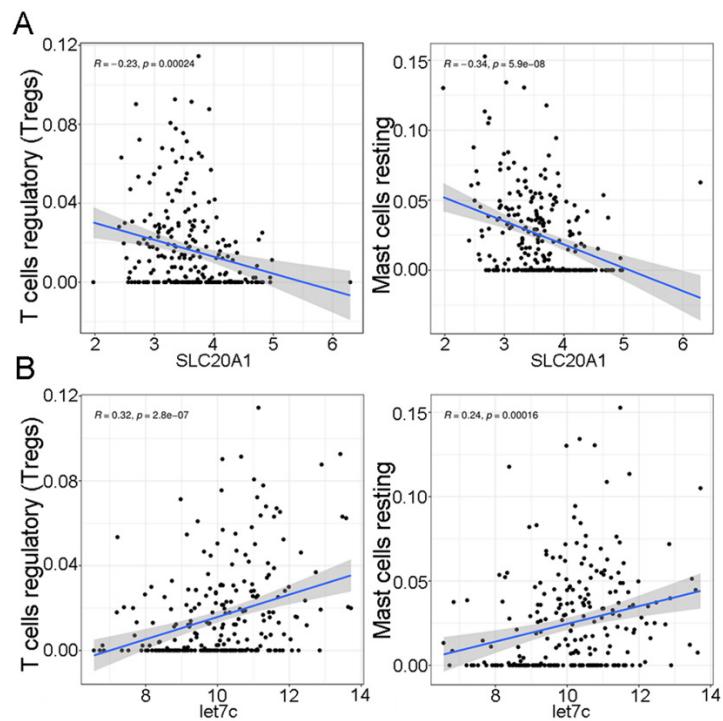

Fig. S7 Correlation analysis for biomarkers and immune cells

A: Analysis of the correlations of SLC20A1 with Tregs and resting mast cells B: Analysis of the correlations of hsa-let-7c with Tregs and resting mast cells.

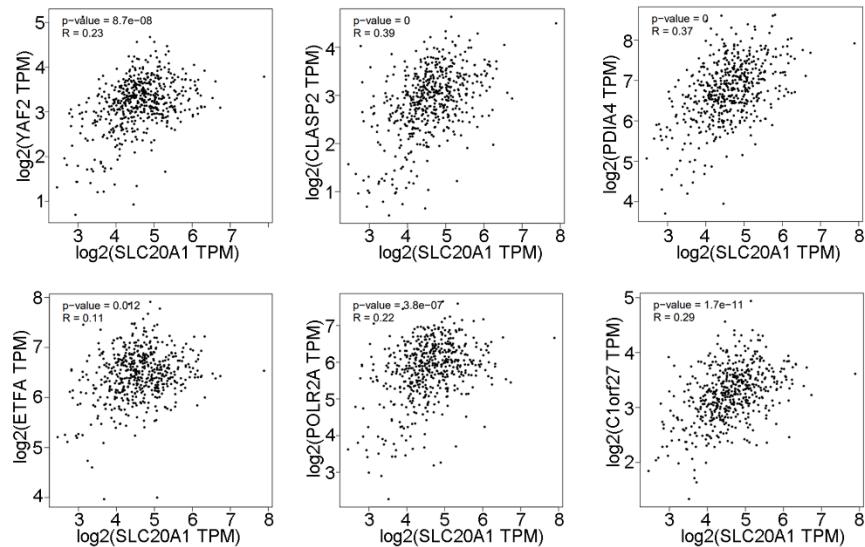

Fig. S8 Correlation analysis for SLC20A1 and target genes of six circRNAs in head and neck squamous cell carcinoma.

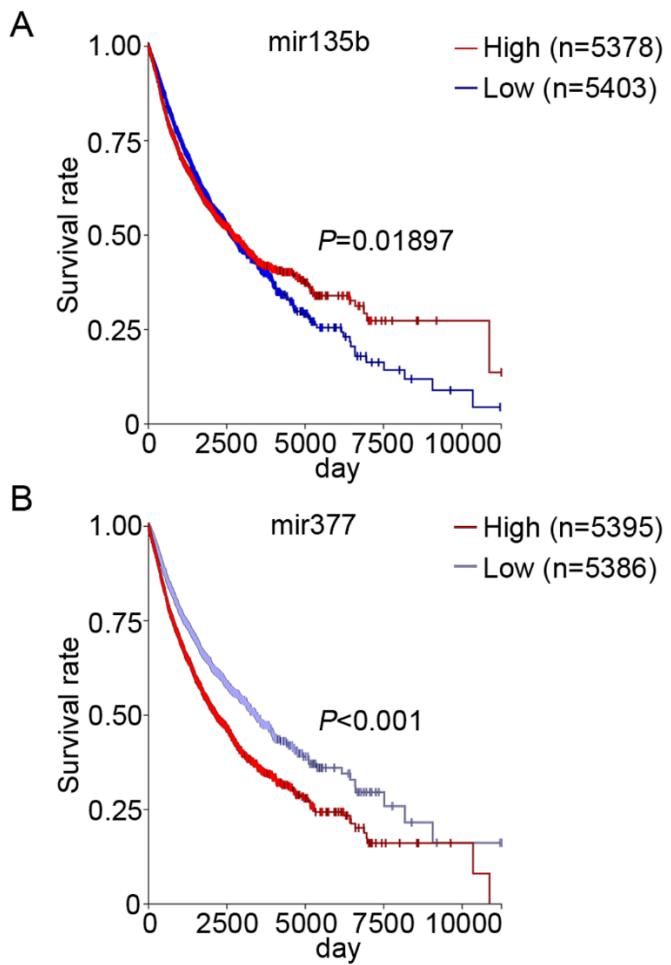

Fig. S9 Pancancer survival analysis for miRNAs

A: Pancancer survival analysis of hsa-miR-135b ($P<0.05$). B: Pancancer survival analysis of hsa-miR-377 ($P<0.01$).

Supplementary Table 2**Abbreviations and Full Names**

Abbreviations	Full Names
OSCC	Oral Squamous Cell Carcinoma
circRNA	Circular RNA
ceRNA	Competing Endogenous RNA
GEO	Gene Expression Omnibus
PPI	Protein–Protein Interactions
HPV	Human Papillomavirus
miRNA	MicroRNA
DEcircRNAs	Differentially Expressed circRNAs
DEmiRNAs	Differentially Expressed miRNAs
DEMRNAs	Differentially Expressed mRNAs
NCBI	National Center for Biotechnology Information
GDC	Genomic Data Commons
KEGG	Kyoto Encyclopedia of Genes and Genomes
AIC	Akaike Information Criterion
ROC	Receiver Operating Characteristic
TIDE	Tumour Immune Dysfunction and Exclusion
ICB	Immune Checkpoint Blockade
CI	Concordance Index
CTL	Cytotoxic T Lymphocytes
MDSCs	Myeloid-derived Suppressor Cells
CAFs	Cancer-associated Fibroblasts
EMT	Epithelial-mesenchymal Transformation
UCSC	University of California, Santa Cruz
PiT1	Phosphate Transporter 1
PITX2	Paired-like Homeodomain Transcription Factor 2
PD-1	Programmed Cell Death Protein-1
TPI	Tumour Promoting Inflammation
