

## Supplementary Materials

Supplementary Figure 1. ZNF248 is negatively associated with cell adhesion molecules and signaling pathways.

Supplementary Figure 2. ZNF248 binding ZEB1 promoter (A) ZNF248 related Chip-seq data in Cistrome Data website and binding site shown in UCSC. (B) Agarose gel electrophoresis demonstrated the enrichment of ZEB1 using ZNF248 by Chip-PCR. (C) Double luciferase reporter gene assay showed that ZNF248 regulate ZEB1 transcription.

Supplementary Figure 3. Silencing ZNF248 in NCM460 and SW1990.
