

**Supplementary Figure 1:** Kaplan-Meier survival curves reconfirming the positive correlation between high CD40LG expression and better OS in LUAD(A), CHOL(B), and HNSC(C) and PFS in LUAD(D), CHOL(E), and HNSC(F).

**Supplementary Figure 2:** Correlation of CD40LG Expression with Clinical Stages, Age, and Gender in Various Cancers. (A) CD40LG expression levels across different TNM stages. (B) CD40LG expression across different T stages. (C) Correlation analysis between CD40LG expression and age in multiple cancer types. (D)

Comparison of CD40LG expression between male and female patients in various cancers.
